NOVEMBER 2007 Vol. 29 No. 11

EMERGING TECHNOLOGIES

- 24 From Passive to Active Thermal Control**
California's transition to cooling pipes for high-performance mass concrete in bridges
by Ric Maggenti
- 33 Engineering Concrete Performance**
Comparing chemical and physical options for producing desired properties
by Dale P. Bentz
- 38 A New Fix for Loose Slab Joints**
System offers rapid installation, immediate return to service, and solid results
by George Garber
- 42 Reliable Air Entrainment**
System shows strong potential for consistency
by Pieter A. VanderWerf and Douglas Watson
- 47 Raising Research Effectiveness**
Strategies for making the most of resources for research
by Torbjörn Stenbeck and Johan Silfwerbrand

ALSO FEATURING

- 53 An Investigation of Low-Strength CMU**
Tracking down the cause of unusual cement hydration
by Hugh Wang, Chenqing Qi, Waltter Lopez, and Bill Goodloe
