

ACI

MATERIALS JOURNAL

- 325 Advanced Assessment of Cracking due to Heat of Hydration and Internal Restraint/*S.-J. Jeon*
- 334 Properties of Concrete after High-Temperature Heating and Cooling/*J. Lee, Y. Xi, and K. Willam*
- 342 Methodology to Couple Time-Temperature Effects on Rheology of Mortar/*J.-Y. Petit, K. H. Khayat, and E. Wirquin*
- 350 Measurement of Reinforcement Corrosion Rate Using Transient Galvanostatic Pulse Method/*H.-s. So and S. G. Millard*
- 358 Large-Scale Processing of Engineered Cementitious Composites/*M. D. Lepech and V. C. Li*
- 367 Recycling Waste Latex Paint in Concrete with Added Value/*A. Mohammed, M. Nehdi, and A. Adawi*
- 375 Validation of Probability-Based Chloride-Induced Corrosion Service-Life Model/*G. S. Williamson, R. E. Weyers, M. C. Brown, A. Ramniceanu, and M. M. Sprinkel*
- 381 Prediction of Early-Age Cracking of Fiber-Reinforced Concrete due to Restrained Shrinkage/*S. H. Kwon and S. P. Shah*
- 390 Simplified Concrete Resistivity and Rapid Chloride Permeability Test Method/*K. A. Riding, J. L. Poole, A. K. Schindler, M. C. G. Juenger, and K. J. Folliard*
- 395 Change in Impact-Echo Response during Fatigue Loading of Concrete Bridge T-Girder/*S. L. Gassman and A. S. Zein*
- 404 Mechanisms of Radon Exhalation from Hardening Cementitious Materials/*K. Kovler*
- 414 Reducing Thermal and Autogenous Shrinkage Contributions to Early-Age Cracking/*D. P. Bentz and M. A. Peltz*
