

MATERIALS  
JOURNAL

- 221 Ultrasonic Transmission to Monitor Setting and Hardening of Fly Ash Concrete/  
*N. De Belie, C. Grosse, and G. Baert*
- 227 Creep, Shrinkage, and Anisotropic Damage in Alkali-Aggregate Reaction Swelling  
Mechanism—Part I: A Constitutive Model/*E. Grimal, A. Sellier, Y. Le Pape, and  
E. Bourdarot*
- 236 Creep, Shrinkage, and Anisotropic Damage in Alkali-Aggregate Reaction Swelling  
Mechanism—Part II: Identification of Model Parameters and Application/*E. Grimal,  
A. Sellier, Y. Le Pape, and E. Bourdarot*
- 243 Corrosion Resistance Performance of Steel-Reinforced Engineered Cementitious  
Composite Beams/*M. Sahmaran, V. C. Li, and C. Andrade*
- 251 Correlating Flexural and Shear Toughness of Lightweight Fiber-Reinforced Concrete/  
*H. Higashiyama and N. Banthia*
- 258 Sugar Cane Wastes as Pozzolanic Materials: Application of Mathematical Model/  
*E. Villar-Cociña, M. F. Rojas, and E. V. Morales*
- 265 Effect of Internally Stored Water on Creep of High-Performance Concrete/*M. Lopez,  
L. F. Kahn, and K. E. Kurtis*
- 274 Effect of Moisture on Piezoresistivity of Carbon Fiber-Reinforced Cement Paste/  
*S. Wen and D. D. L. Chung*
- 281 Correlation between Paste and Concrete Flow Behavior/*J. Hidalgo, C.-T. Chen, and  
L. J. Struble*
- 289 Influence of Type and Replacement Level of Recycled Aggregates on Concrete  
Properties/*K.-H. Yang, H.-S. Chung, and A. F. Ashour*
- 297 Virtual Pervious Concrete: Microstructure, Percolation, and Permeability/*D. P. Bentz*
- 302 Modeling Shrinkage of Portland Cement Paste/*F. Lin and C. Meyer*
